Announcements

Sept. 26 Come see us at the Central Florida Birth Network Fair in Maitland.

How can I prevent leaks?

First, make sure the cloth diaper has a snug fit around your baby's legs and waist, without leaving red marks. Next, make sure all parts of the cloth diaper are tucked into the diaper cover, especially around your baby's legs.

Throughout the day, make sure you are changing the diaper at least every two to three hours. If you think it may be longer than that, for instance at night, before you will be able to change the diaper, consider doubling up. That means, fold a diaper in thirds and place it on top of another diaper. Essentially your child will be wearing two diapers for extra absorbency. It is even possible to triple diaper!

Please remember there is no foolproof diaper that is guaranteed to be leak proof 100% of the time, disposable or cloth. However, we should be able to keep those leaks few and far between!

Send us photos of your eco friendly baby in cloth diapers and he/she could be featured on our website or newsletter!
